Introduction

This report presents basic descriptive statistics for the Polish sample. Its aim is to provide readers with important insight into the structure of the sample and the variables that were measured in the study. However this report does not address the two main sets of variables - the KNOWELDGE items set and the OPINION items set. Both of them are described in detail in separate reports.

## Descriptive statistics and plots

Leseferism-Etatism axis and the matrix of economic-social viewpoint

```
##   leseferism.etatism  mat_econimic      mat_social
##   Min.   :0.00        Min.   :1.000    Min.   :1.000
##   1st Qu.:3.00        1st Qu.:3.000    1st Qu.:2.000
##   Median :4.00        Median :3.000    Median :2.000
##   Mean   :4.31        Mean   :3.018    Mean   :2.479
##   3rd Qu.:5.00        3rd Qu.:3.000    3rd Qu.:3.000
##   Max.   :9.00        Max.   :4.000    Max.   :4.000
##   NA's   :31          NA's   :31       NA's   :31
```
